

## VOORDELEN

- Siliconenvrije constructie
- Compact ontwerp
- Hoge efficiëntie
- Geschikt voor hoge temperaturen

|                                      |  |
|--------------------------------------|--|
| <b>Toepassing</b>                    | Verf, bakovens en andere toepassingen bij hoge temperaturen. |
| <b>Kader</b>                         | Gegalvaniseerd staal   |
| <b>Pakking</b>                       | Gevlochten glasvezel   |
| <b>Medium</b>                        | Glasvezel  |
| <b>Separatoren</b>                   | Aluminium  |
| <b>Sealant</b>                       | Glasvezel  |
| <b>Dimensions</b>                    | Afmetingen voorzijde filter volgens EN 15805                 |
| <b>Maximale temperatuur (°C)</b>     | 260 °C   |
| <b>Temperatuur max. (hoogtepunt)</b> | 400 °C   |
| <b>Vochtigheid (RH)</b>              | 100%   |
| <b>Commentaar</b>                    | Temperatuur: 260 °C continu met pieken tot 400 °C.           |

Hoge efficiency, bestand tegen hoge temperaturen, siliconenvrij compact filter.
